

Protect, Control, and Automate with Our Advanced 1U Rack Solution

Elevate Your AV and IT Infrastructure with Our Advanced 1U Rack Solution!

Our cutting-edge 1U rack solution is designed to meet the demanding needs of AV and IT professionals. Unlike the competition, our product offers non-sacrificial surge protection with Advanced Series Mode, ensuring your equipment is safeguarded against power surges without compromising performance. With integrated power filtration, you can expect clean and reliable power delivery, enhancing the longevity and efficiency of your devices.

In addition to superior protection, our 1U rack solution provides comprehensive IP controllability, inlet current monitoring, and advanced analytics. These features enable integrators to monitor and manage their equipment remotely, diagnose issues proactively, and automate control triggers for seamless operation.

Whether you're looking to protect, control, or automate your AV and IT infrastructure, our innovative solution is the ultimate choice for reliability and performance.

Features:

- ▶ Advanced Series Mode®
- ▶ IP-Controlled PDU
- ▶ Individually switchable receptacles
- ▶ Swappable power cord with lock
- ▶ Remote turn on/off, power cycling, and sequencing
- ▶ Advanced scheduling, AutoPing, and threshold triggered events
- ▶ Remote power management and analytics
- ▶ Seamless integration with third-party control systems and SurgeX CONNECT
