Only the original guarantees safety.

The compliance with the specifications is crucial for your systems in daily operation. Unplanned downtime costs money and endanger the safety of man and machine. Therefore consider using only original filter mats from Pfannenberg.

No compromises: filter class G4.

The quality of a filter medium is defined in classes and is determined by the size of the particles that can penetrate the filter.

The highest class that can be achieved by coarse dust filters in accordance with DIN EN 779 is **filter class G4**, in which **more than 90 % of all particles larger than 10 µm** are blocked.

Worth noting: Pfannenberg uses G4 class filter materials in most of it's products.
