

Defender Series™

Coated Roller Chain

Solvent Resistant
RoHS Compliant

Barrier Protection
Overlapping zinc & aluminum
flaking

Galvanic Action
Zinc corrodes first protecting
the steel

Passivation
Metal oxides in matrix slows
corrosion

Self Repairing
Damaged areas in coating fill
with zinc oxides and carbonates

Pacific's Defender Series™ is specifically designed for outdoor, moisture-intensive and corrosive environments. Individual components are specially coated prior to assembly. Our coating is an alternative inorganic finish that is resistant to water, salt water, solvents, oils, greases and fuels.
