

DTEN Vue Pro PRODUCT GUIDE

Thanks for choosing DTEN

DTEN Vue Pro Product Guide

What's in the Box

1. Vue Pro camera x 2
2. Mounting clip x 4
3. Mounting tape x 4
4. Mounting Plate x 2
5. Screwdriver

What's What

1. Mounting bracket
2. USB connection cable
3. Angle locking thread

DTEN Vue Pro Product Guide

DTEN Vue Coverage Range

See Everyone Clear

DTEN Vue Pro is designed for wide range of Room size from huddle to Large.

With a pair of mid-range and telephoto lenses positioned at carefully designed angles on each side of the TV, it provides a combined 160 degrees of horizontal coverage and great clarity with people further away.

Each camera's 4:3 sensor allows for additional headroom, enabling vertical space adjustment as needed.

DTEN Vue Pro Product Guide

Mounting Guide

Recommended mounting height: 5 ft (1.5m)

Step 1

Measure the height and install the Mounting Template

Step 2

Peel the double side tape and install the Vue Pro camera

DTEN Vue Pro Product Guide

Mounting Guide

Step 3

Install the clip on the back of the TV and push to lock the cable in place. This step help to secure the mount with any TV.

Step 4

Connect the cable to the Bar

Camera Mode

Multi-Camera mode

Multi-Camera mode allows you to enable both the Vue cameras and the main cameras simultaneously from a single conference room.

Enabling this mode will disable all automatic framing, including autoframing (which crops to see the whole group) and Smart Gallery (which crops each individual and places them into their own frame). However, you will have manual PTZ control and the ability to preset each camera.

How to enable Multi-Camera Mode

DTEN Vue Pro Product Guide

Camera Mode

Smart Gallery(Multi-Stream) mode

Smart gallery mode allow multiple video feeds from a single conference room and use cutting edge AI to create individual video feeds of in-room participant.

Enabling this mode unleash the full potential of Vue camera with seamless framing and capturing participants with great clarity, whether they are sitting at the front, middle, or back of the room.

How to Enable Smart Gallery

DTEN Vue ProProduct Guide

Composite View

Smart Gallery(Multi-Stream) mode

Composite view in Team share the same concept to achieve meeting equality using cutting edge AI to create individual video feeds of in-room participant.

Activating this mode providing seamless framing and capturing participants with excellent clarity, regardless of their position in the room.

How to Enable Composite View

DTEN Vue Pro Product Guide

Camera Setting

Angle Adjustment

DTEN Vue allow +/- 11 degree of adjustment.

Vertical Space and Brightness Adjustment

Access the DTEN menu to adjust the headroom and brightness of each camera.

DTEN Vue Pro Product Guide

Mounting Height Table

For the best experience at eye level, we recommend mounting cameras at a height between 1.4 and 1.6 meters. This range ensures the camera is positioned close to eye level, which facilitates more natural and engaging interactions. For aesthetic alignment, we suggest positioning the camera at the Golden Ratio, enhancing both the functionality and appearance of the setup. Below, you'll find detailed guidance on mounting heights tailored to various TV sizes, ensuring clarity and consistency in installation across different environments.

TV Size (in)	TV Center Height		Bottom of TV Height		Camera Mounting Height	
	in	mm	in	mm	in	mm
43	52	1350	41.5	1082	54.5	1414
