

One Touch. Two Roles.

Neat Pad is a simple and elegant touch screen you can use as a controller inside any Zoom or Microsoft Teams meeting room or scheduling display outside. With its sleek design, including ideal screen angle for smooth interaction and viewing, Neat Pad is purpose-built for meeting rooms.

It beautifully blends in anywhere, whether placed on a table, wall or elsewhere. Thanks to just one Power over Ethernet cable, Neat Pad is always on, ready for you to leap into action, and with a dedicated power cable, never runs out of battery.

Simple set-up.

Neat Pad ships with a wall and side mount, so it's easy for anyone to install and set up. Use the wall mount to fix Neat Pad to your meeting room wall as a controller or outside your meeting room as a scheduling display. With the side mount, you can secure Neat Pad to the edge of your doorframe or mullion.

Fully managed and supported.

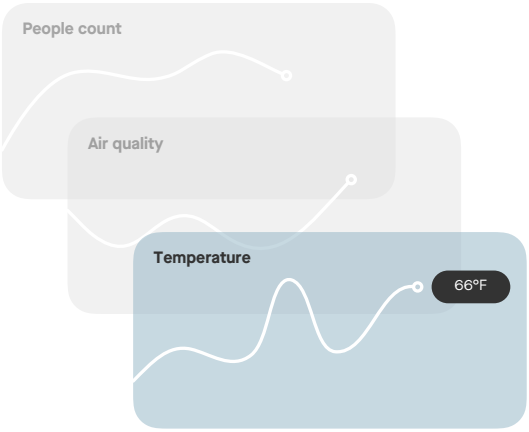

Neat removes complexities and threats thanks to our secure, single-purpose hardware devices, meaning no stressing about passwords and patches. Plus, you can install all the latest upgrades with just one click.

Safer meeting rooms.

As with all Neat devices, Neat Pad empowers companies to offer their employees significant health benefits. In today's hybrid working environment of having to take ever-increasing safety measures, that can be a massive relief. So, Neat Bar incorporates Neat Sense*, a capability that helps you control and monitor air quality, humidity (healthy indoor humidity levels are between 30-50%. Flu viruses can quickly spread due to poor indoor humidity), CO2 and organic chemical levels in the room – scents, odors, etc. Furthermore, it enables you to see whether there are people in a room and, if so, how many. That way, you can be sure of always maintaining correct social distancing.

Just works.

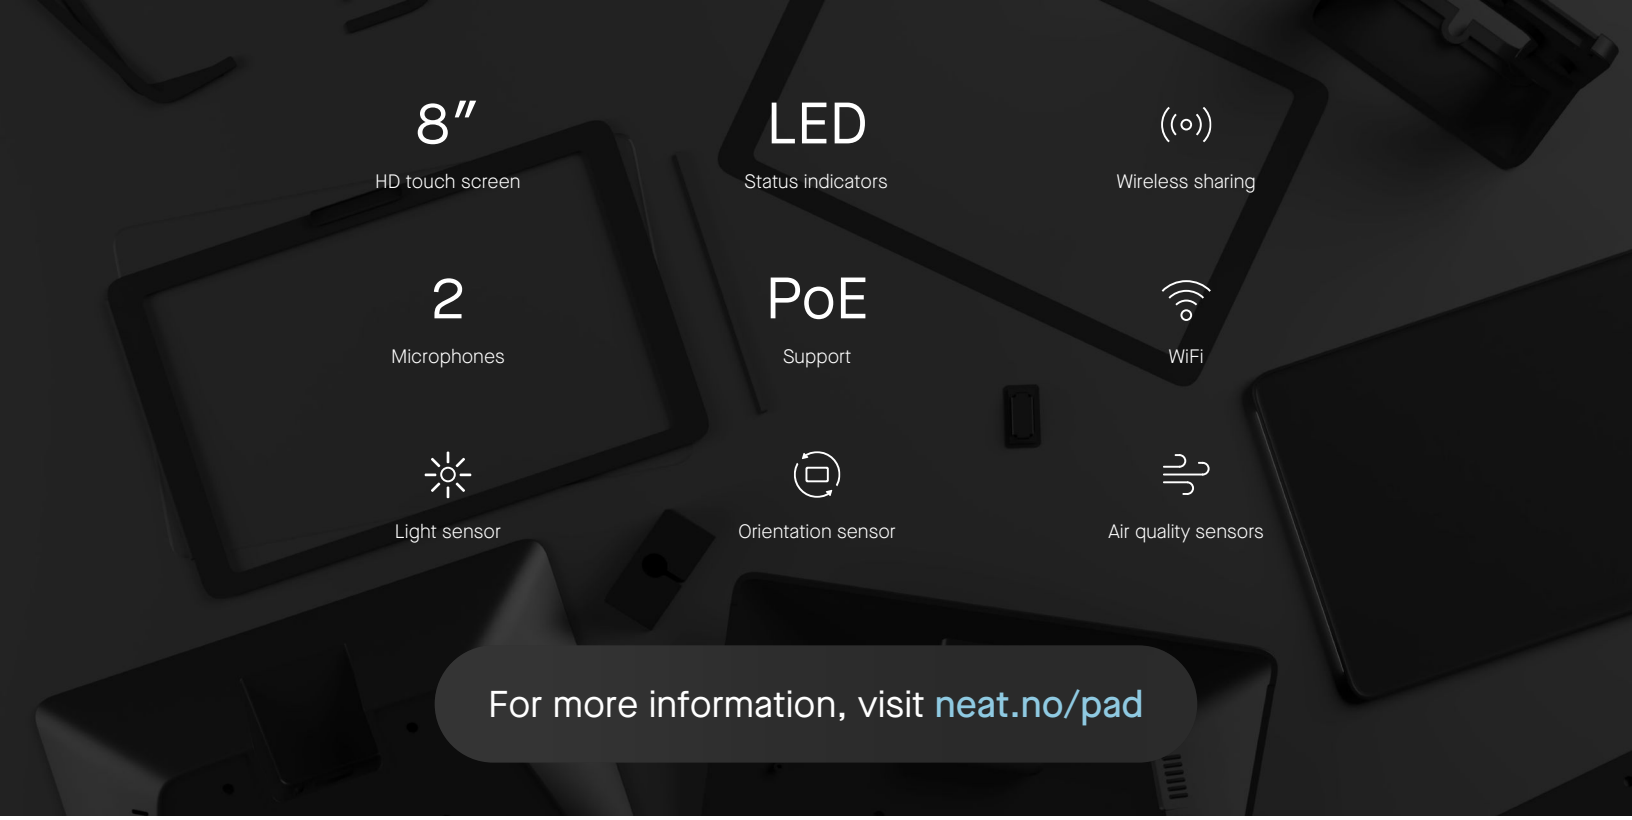

Neat Pad's controller function has two built-in microphones that will offer enhanced audio pickup to support even larger meeting rooms or when facing away from the screen (once enabled with a future software release.) While Neat Pad's scheduling function displays all events booked in the meeting room, with red and green side LED indicators showing the availability of the room at any given time.
