

Adjustable Depth Wall-Mount Rack (95 lb) *RB-AWR Series*

Adjustable depth wall rack for mounting 19" equipment with flexible depth for telecom and IT installations.

Note: This product line has been discontinued as a stocked series on May 01, 2026.

Information is for reference only. It has been replaced with **APB Series**.

For alternative solution assistance, **contact Hammond here** or call: USA (716) 630-7030, Canada and International (519) 822-2960.

Key Features and Benefits

- 14-gauge steel construction (95 lb **capacity**) provides reliable support for patch panels, switches, and rack-mounted equipment.
- Adjustable depth design (15" to 21") allows flexible mounting without disassembly to accommodate varying equipment depths.
- Open frame wall-mount design (19" rack compatible) supports efficient installation and accessibility.
- One (1) pair of 19" square hole mounting rails with rack unit indicators supports standard rack equipment and consistent installation. Includes mounting hardware pack with (24) M5 screws and cage nuts for equipment installation.
- Rear cable access with multiple tie points supports organized cable routing in wall-mounted installations.
- Self-squaring knock-down design ships unassembled for easier handling, reduced shipping cost, and simplified installation.
- Available in 6U, 8U, and 12U sizes supports a range of installation requirements.
- TAA-compliant, manufactured in North America supports government procurement requirements and ensures consistent quality.
- Black powder coat finish (GREENGUARD Gold, TSCA, RoHS compliant) supports indoor air quality and environmental compliance.

The RB-AWR Series adjustable depth wall rack provides a flexible solution for mounting 19-inch rack equipment in telecom and IT environments. With adjustable depth from 15 to 21 inches and square hole mounting rails, it supports a wide range of equipment and installation requirements.

Constructed from 14-gauge steel with a 95 lb load capacity, the RB-AWR is ideal for structured cabling and network deployments requiring flexibility and open access.

Where the RB-AWR series works best

- Telecom backboards and network demarcation points.
- Network closets requiring adjustable mounting depth.
- Installations with varying equipment sizes or future expansion needs.
- Structured cabling environments with open access requirements.
- Retrofit installations where flexibility is required.

Applications and when to use the RB-AWR series

- Installations requiring adjustable depth (15"–21") for varying equipment sizes.
- Applications needing open frame mounting with flexible configuration.

- Environments where equipment depth may change over time.
- Deployments requiring cost-effective mounting with greater flexibility than fixed racks.
- Installations needing square hole rails for cage nut compatibility.

When another product may be a better choice

- When you need a fixed depth wall rack with higher capacity, consider our **RB-2PW** Series.
- When you need a hinged wall bracket for rear access, consider our **APB** Series.
- When you need a wall bracket with an integrated shelf, consider our **APBS** Series.
- When you need a center-hinged rack for balanced access and servicing, consider our **HWMR** Series.

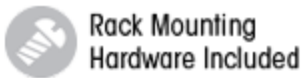

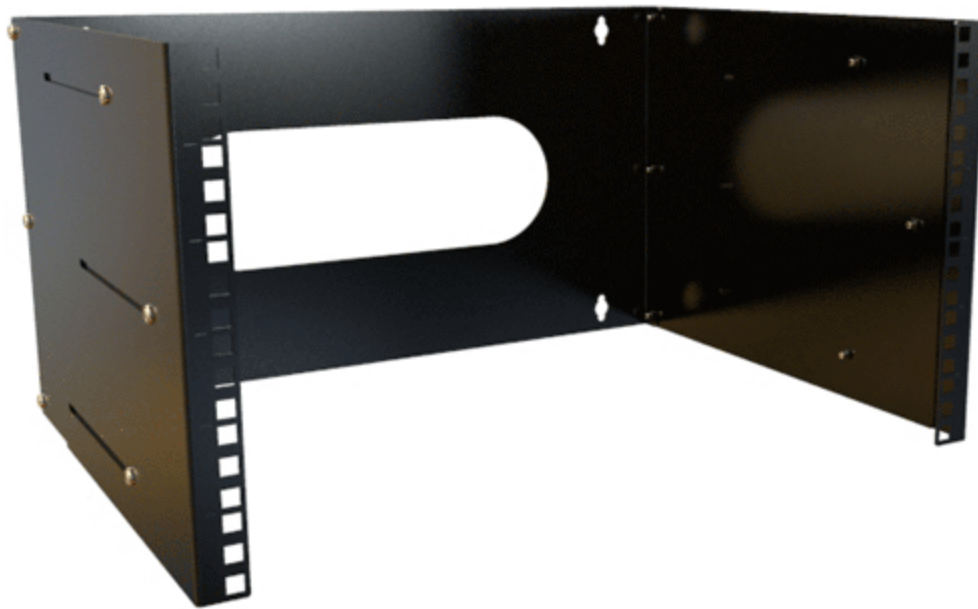

Accessories

- Rack Panels for Rack Optimization
- Rack Mount Keyboard & Equipment Shelf
- Hardware for Rack Mounting Solutions
- Ground Stud Kit
- Universal Rack Shelf Fixed Steel (Up to 200 lb Capacity)
- Hook and Loop Cable Straps Pre-Cut 96 Inch
- We Manufacture PDUs and Outlet Strips
