WARNING

Loose fastener can cause cabinet(s) to fall and seriously injure.

Torque fasteners to 30 in-lbs.

Use bolts and lock washers in kit to attach correct fastener at each bolt location marked on cabinet top cover.

CAUTION

Insecurely joined cabinets can come apart during lifting and fall causing injury and product damage

Ensure joining kits are properly installed between each enclosure to avoid product damage. Hoffman catalog number PJ2FHF2 for side-to-side and PJ2FBF for front-to-back enclosure joining.

Lifting Bar

WARNING

Twisting or tipping cabinet set can cause injury and damage. Minimize tipping by using recommended Lifting Bars that provide lifting points equidistance from ends of enclosure set.

WARNING

Falling Lift Bars can cause serious injury. When not in use, lay Lift Bars flat.
