35kV	600A Deadbreak Cam-Op Alignment Bracket	750CAB
------	---	--------

750CAB Cam-Op Alignment Bracket

Applications:

The 750CAB Cam-Op alignment bracket is a stainless steel piece of hardware that fits over the 750LBM3 mountable insulated bushings. It is used to guide the link to the mating 755LR elbows or 755BE bushing extenders. It also serves as the guide for the 750LK-C Cam-Op link allowing it to lock into place or unlock.

Features:

- Deadbreak Cam-Op Alignment Bracket
- Part of assembly that can be easily connected or disconnected using standard hand tools and equipment in a de-energized state
- Optional accessories allow visible external separation, by-pass, isolation, dead-ending, grounding, and testing as well as adding taps, surge arrestors, and circuit protection
