15/25kV	200A Deadbreak Bail	150TB3
---------	---------------------	--------

Applications:

The ELASTIMOLD® 150TB3 bailing assembly kit consists of two pieces of flat stainless steel stock, which are designed for connecting the hold-down bails supplied with the ELASTIMOLD® dead-break elbow connector 156LR. This kit enables the dead-break elbow connectors to be positively secured to an ELASTIMOLD® tee connector, K150T, or in-line junction, K150S, minimizing the possibility of being dislodged due to cable movement.

Ratings:

Not Applicable-Mechanical Connections

Ordering Instruction:

To order, specify **150TB3** Deadbreak Bail.

Each kit contains the following:

- | | | |
