

Rack Mount Fan Cooling Panel for Active Ventilation *PPFP Series*

Rackmount fan panel designed to support active cooling with configurable fan and filter installations.

Key Features and Benefits

- Steel construction provides durable support for active cooling fan installations in rack environments.
- Designed to accept standard square fans, allowing flexible fan selection and configuration.
- Enables creation of custom fan or filter-fan panels, supporting both intake and exhaust airflow strategies.
- Supports push-pull cooling configurations when used with compatible fan grill panels.
- Available in multiple configurations (2 or 3 fan openings, 3U and 4U sizes) to match cooling requirements.
- Mounts directly to standard 19 in EIA-compliant rack rails for universal compatibility.
- Compatible with filter fan grills for dust control and filtered airflow.
- Supports integration with thermostats for temperature-controlled cooling systems.
- TAA-compliant, manufactured in North America within an ISO 9001 certified facility.
- Black powder coat finish (GREENGUARD, TSCA, RoHS compliant) supports environmental and durability requirements.

The PPFP Series rack mount fan panels provide a flexible solution for active cooling in rack systems. Designed to support standard square fans and optional filter grills, they allow customizable airflow configurations to meet specific cooling requirements. By enabling intake, exhaust, or push-pull cooling strategies, the PPFP Series helps maintain optimal operating temperatures in data centers, telecom rooms, and high-density rack environments.

Accessories

- Hardware for Rack Mounting Solutions
- Tube Axial Fans
- Rack Rail Reducer Panel 23 to 19 Inch
- Rack Adapter Conversion Panel
- Rack Cabinet Cooling Fan Kits
- Filter Fan Grills

Fan/Cable Entry Rack Panel

Part No.	Mounting Dimensions		Rack Units	Number of Fan/ Holes	Accepts Fan Size
	Height	Width			
PPFP190802BK1	5.25	19.00	3U	2 Openings	3.15
PPFP190803BK1	5.25	19.00	3U	3 Openings	3.15
PPFP191202BK1	7.00	19.00	4U	2 Openings	4.70
PPGP191202BK1	5.25	19.00	3U	2 Fan Grills	4.70

Where the PPFP Series Works Best

- Data centers and server rooms
- Telecom and network installations

Best Applications for the PPFP Series

- Adding active cooling to rack systems
- Supporting intake or exhaust airflow configurations

- High-density rack environments
- Open frame racks and enclosed cabinets
- Installations requiring active cooling
- Improving thermal performance in high-density racks
- Integrating fan and filter-based cooling solutions
- Managing temperature in enclosed or restricted airflow environments
