Rack Cable Tie Down Bracket Steel Cable Anchor *CMRB Series*

Compact cable tie-down bracket designed for precise cable anchoring and strain relief in rack systems.

Key Features and Benefits

- 16-gauge steel construction provides durable cable anchoring and strain relief for IT, AV, and network installations.
- Compact bracket design provides a dedicated cable tie-down point for precise cable anchoring using hook and loop straps or cable ties.
- Helps reduce strain on connectors and ports by securing cables close to equipment.
- Small footprint allows placement exactly where cable support is needed without consuming rack space.
- Ideal for creating anchor points to manage cable routing and prevent cable movement.
- Designed for use with standard EIA-310 rack systems for flexible installation.
- Low-profile design supports high-density rack environments without interference.
- Compatible with hook and loop straps such as our TS Series for clean, reusable cable bundling.
- TAA-compliant, manufactured in North America supports government procurement requirements and ensures consistent quality.
- Black powder coat finish (GREENGUARD, TSCA, RoHS compliant) supports indoor air quality and environmental compliance.

The CMRB Series cable tie-down brackets provide a simple and effective solution for anchoring cables within rack systems. Designed as a compact mounting bracket, they allow installers to secure cable bundles exactly where needed, improving organization and reducing strain on equipment connections.

Unlike generic cable brackets, the CMRB Series provides a defined cable tie-down point for precise cable anchoring and strain relief. This makes it ideal for targeted cable management applications where control, flexibility, and reliability are critical.

Accessories

- Hardware for Rack Mounting Solutions

		Mounting Dimensions	
Part No.	Rack Units	Height	Length
CMRB	1U	1.75	3.50

Where the CMRB Series Works Best

- Data centers and IT rooms.
- Network and telecom installations.
- AV and broadcast environments.
- Structured cabling deployments.

Best Applications for the CMRB Series

- Creating cable tie-down points near equipment connections.
- Providing strain relief for network and power cables.
- Securing small cable bundles within rack systems.
- Supporting clean and controlled cable routing paths.

- High-density rack environments requiring precise cable control.
- Adding flexible cable anchoring points in custom installations.
