Shape the Future of QuickSpecs – Your Input Matters

HPE Cray XD675

HPE is bringing the power of supercomputing to datacenters of any size with the HPE Cray XD675.

HPE Cray XD675 is a top-performing GPU-accelerated server, delivering AI and HPC workload solutions to rack-scale, in a rack and roll fashion.

HPE Cray XD675 is an 8U chassis system that contains a single 2x CPU node with 8x AMD MI300X OAM GPUs. It offers a complete, scalable solution for AI & HPC customers everywhere, with flexibility of fabric, memory, storage and operating system. HPE Cray XD675 provides maximum performance for advanced HPC Simulations, AI Training and Deep Learning.

Built with Exascale-ready networking technologies, integrated storage, extensive software portfolio and management tools, HPE Cray XD675s can enable customers to innovate and prepare for tomorrow's challenges.

Cray XD675 Server System Key Features

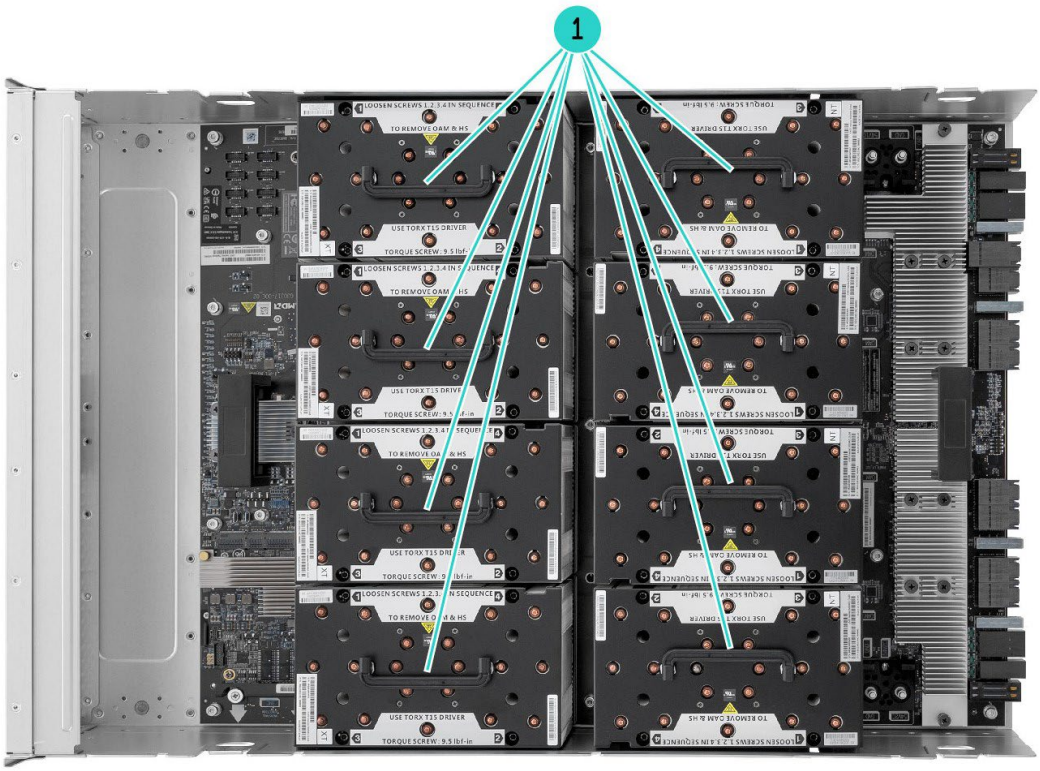

- 8U Single-Node Chassis (Air-Cooled)
- GPUs: 8x AMD MI300X OAM GPUs providing leadership performance for AI Training, Deep Learning and advanced HPC simulations.
- CPUs: Support for 4th Generation AMD® EPYC® Scalable Processors: "Genoa" up to 400W TDP
- DRAM: Support for up to 24x DDR5 5600MT/s DIMMs (supported at 4800 MT/s with 4th Generation AMD® EPYC® Scalable Processors)
- High-Speed Fabric: 8x PCIe Gen 5.0 Half-Height, Half-Length slots supporting InfiniBand NDR and Ethernet, providing direct switchable connections between High-Speed Fabric, GPUs, NVMe drives and CPUs.
- Storage: Up to 16 SFF NVME SSDs, 8 SAS/SATA SSDs, and 2 M.2 2280 Kits.
- Power Supplies: 3000W Platinum Kit (6 x 3000W + 2 x 2400W) and 3000W Titanium Kit (6 x 3000W + 2 x 2700W)
- PCIe Expansion: 5x Full-Height, Half-Length PCIe Gen 5.0 embedded 2-port 10G Base-T (RJ45), 1 1GbE NIC, 1x BMC Port, 1x USB3.0 type C, 1x debug port (type C) PWR Button/Health/Power/UID LEDs

Rack Airflow Requirements

HPE Cray XD675

The increasing power of new high-performance processor technology requires increased cooling efficiency for rack-mounted servers. For maximum cooling, HPE racks are recommended to allow these racks to be fully loaded with servers using the latest processors. For detail information please see Cray XD675 System User Guide:

https://www.hpe.com/info/CrayXD675-docs

Thermal Boundaries

The ability to operate up to 35C will come with limitations on choice of CPU and Memory SKUs. The tables below outline the thermal operating ranges for the CPU and Memory SKUs

Notes:

- If a third-party rack is used, observe the following additional requirements to ensure adequate airflow and to prevent damage to the equipment.
- Always use blanking panels to fill all remaining empty front panel U-spaces in the rack. This arrangement ensures proper airflow. Using a rack without blanking panels will result in improper cooling that can lead to thermal damage.

Standard Features

Processors (Select two of the following)

4th Gen AMD® EPYC® Processor	Cores	Base Frequency	Max Frequency	Max Memory	Default TDP	Cache	Memory Speed

Notes: Mixing of Processors is not allowed

Memory (Select up to 24 of the following)

Type	DDR5 Registered (RDIMM)
DIMM slots available	24 slots per server for XD675 6 channels per processor, 2 DIMMs per channel
Minimum capacity	768GB per server
Maximum capacity	3TB per server

Description	SKU
SK Hynix 64GB (1x64GB) Dual Rank x4 DDR5-5600 CAS-52-52-52 R Standard Memory Kit for HPE Cray XD	S4J61A
HPE Cray XD 96GB (1x96GB) Dual Rank x4 DDR5-5600 CAS-52-52-52 R Standard Memory Kit	S4L14A
SK Hynix 128GB (1x128GB) Quad Rank x4 DDR5-5600 CAS-52-52-52 R 3DS Std Memory Kit for HPE Cray XD	S4J68A

Notes:

- Minimum memory density per platform is 2304GB to insure adequate performance
- For 4th Gen EPYC Processors, maximum supported speed is 4800MT/s. Memory options with faster transfer speeds are still compatible, but will operate at 4800MT/s.
- Mixing of x4, x8, 3DS memory is not allowed
- Mixing of Memory DIMMs is not allowed
- 96GB Memory cannot be mixed with any other Memory
- Optimal performance requires 6 (1 DIMM / channel) or 12 (2 DIMMs / channel) DIMMs per processor

Standard Features

HPE Cray XD675 UEFI

Unified Extensible Firmware Interface (UEFI) is an industry standard that provides better manageability and more secured configuration than the legacy ROM while interacting with your server at boot time.

The UEFI System utilities is embedded in the system ROM. Its features enable you to perform a wide range of configuration activities, including:

- Configuring system devices and installed options.
- Enabling and disabling system features.
- Displaying system information.
- Selecting the primary boot controller including configuring drive arrays and partitions.
- Configuring memory options.

Launching other pre-boot environments.

HPE Cray XD675s with UEFI can provide:

- Secure Boot that enables the system firmware, option card firmware, operating systems, and software collaborate to enhance platform security.
- An Embedded UEFI Shell that provides a preboot environment for running scripts and tools.
- Boot support for option cards that only support a UEFI option ROM.

UEFI

UEFI provides a higher level of security by protecting against unauthorized operating systems and malware rootkit attacks, validating that only authenticated ROMs, pre-boot applications, and OS boot loaders that have been digitally signed are run. Configure and boot your servers securely with industry standard Unified Extensible Firmware Interface (UEFI). The HPE Cray XD675 is a UEFI Class 3 solution and does not support the less secure CSM (Combability Support Module) BIOS.

Software Portfolio for HPE Cray XD675

- **Operating Systems and Virtualization Software Support**
- Red Hat Enterprise Linux (RHEL) 9.4+
- Ubuntu (22.04. 24.04)

Server Management

HPE Cray XD675 Baseboard Management Controller

Embedded, in-depth server-level monitoring and management technology offering system management, service alerting, reporting and remote management including remote console and virtual media mount.

Industry Standard Redfish

The HPE Cray XD675 supports industry standard DMTF Redfish that provides API conformance and offers simplified server management automation such as configuration and maintenance tasks based on modern industry standards. Learn more at: **https://dmtf.org/standards/redfish.**

Standard Features

Software Development Tools (Programming languages, debuggers, libraries)

Additional 3rd party software developmental tools:

- AMD ROCm 6.2+

Security

- Secure Start – only boot Signed FW
- UEFI Secure Boot
- NIST SP800-193 Protect, Detect, Recover for BIOS and BMC Tamper-free updates – components digitally signed and verified using CNSA strength RSA4096 signing key.
- Secure Recovery – recover critical firmware to known good state on detection of compromised firmware. Event recorded in the event log.
- UEFI TPM 2.0 (Trusted Platform Module 2.0) HPE Cray XD675 supports OpenSSL 3.0 provide for secure remote connectivity session to system
- SPI BUS monitoring to ensure BIOS and BMC FW are always signed and secure.
- Secure out-of-the-box high-entropy RMC administrator password is unique for each system.
- Support for multiple Redfish role-based access control (RBAC) accounts ensuring that passwords need not be shared and can provide separation of duties.

Service and Support

HPE Services

No matter where you are in your digital transformation journey, you can count on HPE Services to deliver the expertise you need when, where and how you need it. From planning to deployment, ongoing operations and beyond, our experts can help you realize your digital ambitions.

HPE Tech Care Service

HPE Tech Care Service is the operational support service experience for HPE products. The service goes beyond traditional support by providing access to product specific experts, an AI driven digital experience, and general technical guidance to not only reduce risk but constantly search for ways to do things better. HPE Tech Care Service delivers a customer-centric, AI driven, and digitally enabled customer experience to move your business forward. HPE Tech Care Service is available in three response levels. Basic, which provides 9x5 business hour availability and a 2-hour response time. Essential which provides a 15-minute response time 24x7 for most enterprise level customers, and Critical which includes a 6-hour repair commitment where available and outage management response for severity 1 incidents.

HPE Lifecycle Services

HPE Lifecycle Services provide a variety of options to help maintain your HPE systems and solutions at all stages of the product lifecycle. A few popular examples include:

- Lifecycle Install and Startup Services: Various levels for physical installation and power on, remote access setup, installation and startup, and enhanced installation services with the operating system.
- HPE Firmware Update Analysis Service: Recommendations for firmware revision levels for selected HPE products, taking into account the relevant revision dependencies within your IT environment.
- HPE Firmware Update Implementation Service: Implementation of firmware updates for selected HPE server, storage, and solution products, taking into account the relevant revision dependencies within your IT environment.
- Implementation assistance services: Highly trained technical service specialists to assist you with a variety of activities, ranging from design, implementation, and platform deployment to consolidation, migration, project management, and onsite technical forums.
- HPE Service Credits: Access to prepaid services for flexibility to choose from a variety of specialized service activities, including assessments, performance maintenance reviews, firmware management, professional services, and operational best practices.

Configuration Information

This section lists some of the steps required to configure a Factory Integrated Model. To ensure only valid configurations are ordered, Hewlett Packard Enterprise recommends the use of a Hewlett Packard Enterprise approved configurator. Contact your local sales representative for information on configurable product offerings and requirements.
Notes: FIO indicates that this option is only available as a factory installable option.

Step 1: Choose a Chassis

HPE Cray Supercomputing XD675 Configure-to-order Server	P68867-B21

Step 2: Choose GPU Option

AMD Instinct MI300X 8-way Accelerator for HPE Cray Supercomputing XD675	P69044-B21

Step 3: Select M.2 Storage Options (max 1)

Micron 7450 960GB NVMe Gen4 Read Intensive M.2 2280 SSD for HPE Cray XD	P69525-H21

SK Hynix 128GB (1x128GB) Quad Rank x4 DDR5-5600 CAS-52-52-52 R 3DS Std Memory Kit for HPE Cray XD	S4J68A

Notes:
- Minimum System Memory of 2304GB Recommended
- Certain limitations may apply to select Memory options. Please refer to the thermal table above or contact your HPE sales representative

Step 6: Choose from the following SFF Storage and RAID options

Hot Plug SFF
NVME SSDs (max 16)

HPE Cray XD675 1.6TB NVMe Mixed Use SFF U.3 SSD	S4K93A
HPE Cray XD675 3.2TB NVMe Mixed Use SFF U.3 SSD	S4K94A

HPE Power Distribution Units

Power Distribution Units (PDUs) are an integral piece to this data center solution and HPE offers several types. Basic PDUs provide reliable power with 0U or 1U installation options. Metered PDUs have added intelligence to precisely track power usage and switched PDUs provide both local and remote power management. There are additional metered PDUs that are recommended for this solution that are not part of the mainstream PDU product offering. They are as follows:

Environmental-friendly Products and Approach – End-of-life Management and Recycling

Hewlett Packard Enterprise offers end-of-life **product return, trade-in, and recycling programs**, in many geographic areas, for our products. Products returned to Hewlett Packard Enterprise will be recycled, recovered or disposed of in a responsible manner.

The EU WEEE Directive (2012/19/EU) requires manufacturers to provide treatment information for each product type for use by treatment facilities. This information (product disassembly instructions) is posted on the **Hewlett Packard Enterprise web site**

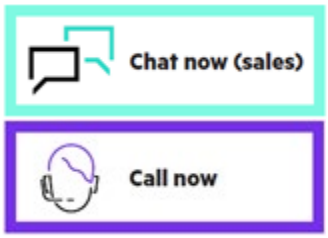

These instructions may be used by recyclers and other WEEE treatment facilities as well as Hewlett Packard Enterprise OEM customers who integrate and re-sell Hewlett Packard Enterprise equipment.
