

ABB Process Automation focuses on delivering innovative solutions for process and hybrid industries. ABB integrates engineering expertise with software to optimize manufacturing, movement, power, and operations, aiming to enhance plant-level digitalization and transform process operations through Distributed Control Systems (DCS) ABB Process Automation emphasizes safety, availability, and cybersecurity, ensuring industries can compete in a rapidly changing world.

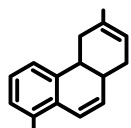

Products:

- Distributed control systems
- Industrial software
- Industry specific solutions
- Flame scanners
- ABB Ability™
- Advanced services
- Control room solutions
- Fieldbus
- Grid automation
- Manufacturing Execution System (MES)
- Manufacturing Operations Management (MOM) software
- Pressure measurement
 - Process control systems

Various Products

Industries:

Chemical

Food & Beverage

Maritime & Offshore

Oil & Gas

Contact Gross Automation to find the ideal solutions for your unique needs and applications. We supply the engineering expertise and product knowledge customers have relied on since 1990.
