

Mersen is a global company specializing in electrical power and advanced materials. They design and manufacture a range of products for sectors such as energy, electronics, transportation, chemicals, pharmaceuticals, and process industries. Their main focus areas include electrical power solutions and advanced materials and technologies. Mersen provides products that are critical components in electrical safety and power management. The company also develops advanced materials used for high-temperature applications, anti-corrosion equipment, and electrical carbon brushes, which are applied across industries like aerospace, electronics, glass manufacturing, and metallurgy. Mersen's solutions are aimed at improving performance, efficiency, and safety in electrical systems and industrial processes.

Products:

- Fuses
- Fuse holders & systems
- Power distribution blocks
- Surge protection
- Low-voltage switches
- Capacitors
- Bus bar solutions
- Heat exchangers
- High power switches
- DC protection for EV & batteries
- Accessories

Surge Protective Devices

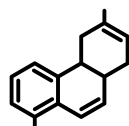

Fuses

Industries:

Alternative Energy

Chemical

Electric Mobility

Infrastructure

Power Distribution

Rail

Contact Gross Automation to find the ideal solutions for your unique needs and applications. We supply the engineering expertise and product knowledge customers have relied on since 1990.
