

Jokab Safety, founded in Sweden in 1988, specializes in machine safety solutions. Acquired by ABB in 2010, it now operates under ABB's brand, enhancing their machine safety and low-voltage product offerings. Jokab Safety provides a range of safety components and systems, including the notable Eden non-contact safety switch, which uses RF technology for secure, non-contact machine shut-off. These products are designed to meet industry safety standards and OSHA requirements, focusing on protecting employees and equipment while maintaining production efficiency. The integration of Jokab Safety into ABB has allowed for a broader reach and more comprehensive safety and automation solutions in various industries.

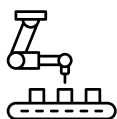

Products:

- Programmable safety controllers
- Safety controllers
- Safety relays
- Safety sensors, switches & locks
- Optical safety devices
- Emergency stops & pilot devices
- Safety control devices
- Pressure sensitive devices
- Accessories
