

FRT connect

Bring your pushbuttons and switches to the M12 world

4-5-6

simple
fast
universal

➔ **Bring your pushbuttons and switches to the M12 world - ingeniously simple!**

→ **Time-consuming and costly wiring is no longer necessary**

The FRT connect with M12 connector means no conventional or error-prone wiring. The installation with M12 connector is simple and safe, a reverse or incorrect polarity is not possible. Plug&work: plug in and get started!

→ **For combination with various series**

The FRT connect contact blocks are suitable for SCHLEGEL pushbuttons and switches for mounting diameter 22.3 or 16.2 mm with 16 mm housing neck and 3 mm travel. The diversity of possible contact equipments ranges from only 1 NO to 2 NC with illumination.

→ **4- and 5-pole M12 connectors**

There is also the flexibility in choosing the type of connection: With FRT connect you have the choice between a 4-pole connector with SCHLEGEL pin assignment or a 5-pole connector with AIDA pin assignment. The connectors are A coded.

→ **Illuminated variants**

FRT connect can also be used for pushbuttons and switches with illumination. If you connect the illuminated variants of FRT connect with an emergency-stop head or a pilot light head - FRT connect is accentuating it.

→ **High switching capacity and long lifetime**

SCHLEGEL attaches great importance to the quality and robustness of its products. This also applies to the new FRT connect. The contact blocks are characterised by a long lifetime and a high switching capacity.
