QUADRIE CONCRETE SCREW ANCHORS

"STOP THE SNAPPING"
It's a Screw and an Anchor

Large fillet under head to fit $\frac{3}{16}$ " and $\frac{1}{4}$ " holes provides greater driving strength

Fluted, interrupted threads aid tapping into masonry products

Hilo threads for faster application

Silver color to match conduit, strap and concrete

We will be glad to send a sample bag of 10 pieces to our Distributors for their customer trials. Please specify size!

Also available in Flat Head.

A coating is applied after heat-treating to provide anti-corrosion protection. The coating is a RoHs compliant mechanical zinc coating that offers 2000 hours to 15% red rust corrosion in salt spray testing performed to ASTM B117 specifications.

Metallics offers our Distributor/Contractor users an alternative to the blue color of standard concrete screws. Silver color is cosmetically appealing when used with zinc plated or stainless steel brackets, electrical fixtures or conduit.

WALL DOG™ ANCHORS

Universal Light Duty Anchors

All steel, one-piece screw anchors, features high-profile threads for easy fastening into wallboard and other masonry base materials

- Installs in a variety of base materials
- Installs directly through fixtures into wallboard – no second step is required
- When removed the Wall Dog leaves a much smaller hole than toggles or other systems
- Thread design prevents spinning and stripping
- Heat treated point penetrates metal and wood studs
- Two finished heads, oval and pan
- Two colors, chrome & white head
- No pilot hole required for wallboard
- Can be easily backed out of hole
- No hole spotting required

RAPID-SET® TOOLS

The fastest, easiest and most reliable way to install machine screw lead (caulk-in) anchors

- For machine screw lead (caulk-in) anchor sizes 1/4" and 3/8".
- Automatically sets anchor just below the surface.
- Designed for use with power tools.
- Maximizes expansion of bottom portion of lead sleeve.

PART#	UPC#	SIZE	WT. PER PKG.	STD. PKG. UM
MRST1420	25110	1/4-20	.14	1
MRST3816	25112	3/8-16	.26	1

*Note: Rapid-Set Tools draw the anchor's internal insert up into the anchor's outer sleeve; this installation process eliminates the need to maintain a back bearing surface (required by hammer setting tools).

Please note that wood and tapping screw lead anchors have a lead outer gripping shell. In applications where lead is considered dangerous, we do not recommend their use. Until U.S. Govt. Safety Regulations take a firm stand on their use, Metallics will continue to offer this product, As do many other fastener competitors.

A superior alternative to traditional wedge anchors

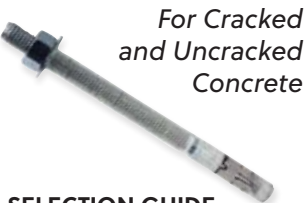

HAMMER DRIVE WEDGE ANCHORS

STEEL ZINC

- Installs six times faster than an ordinary wedge-type anchor.
- Easily installs through pre-drilled holes in plates and footings – no need for templates.
- No special tools required.
- Tensions during setting process.
- Deforms the concrete to set, eliminating creep and loss of pre-load.
- Faster, easier and more consistent installation.

RISE KWIK-LOC™ SYSTEM

A fast and easy way to hang signs, florescent fixtures, speakers, busbars, cable trays, and piping just to name a few.

No Tools Needed and KWIK-LOCS™ are reusable!

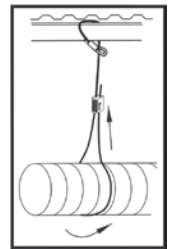

Kwik-Loc™ with 3/32 cable will safely suspend 150 lbs vertical.

NOTE: Suspension at angles does reduce safe working load.

LAGMASTER PLUS™

The Lagmaster Plus™ is the electrician's pole tool. The unique plug-in heads make it the most efficient tool of its kind. It increases safety by keeping your men on the floor. Use it to install ceiling wire, jack chain, threaded rod, smooth rod and overhead screw installation. Power the pole with any 3/8" or 1/2" battery operated or corded drill.

One pole...many applications!

Choose from two (2) different adjustable length models.

- MLMT4 Triple 4' (18' ceilings)
- MLMT6 Triple 6' (24' ceilings)

Lagmaster Plus™ wire plug hangs 12 or 9 Gauge wire. No need for ladders, scaffolding or scissor lifts.

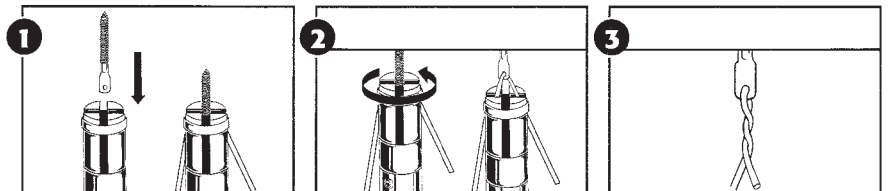

Pre-wrapped wire on eye lags require a special plug (pre-wrapped plug).

Hang it up. (wire plug)

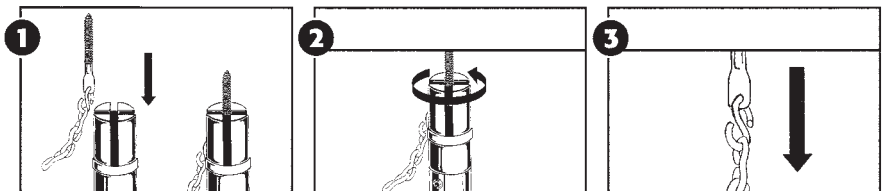

Hang Wire. Move ring into the up position with set screw

1 Insert the eye lag screw into secured wire plug. Insert the wire through the hole and bend the tails down.

2 Adjust the pole to length and rotate the screw until it is seated. Pull down on the pole so that the wire is caught on the ring.

3 Rotate the pole again to twist the wire. Pull the wire through the plug to complete the installation.

1 Secure a #1 1/2 "S" hook to an acoustical eye lag and to the proper size chain for your job. Insert it into the Lagmaster Plus™.

2 Secure the chain in the magazine so it does not whip when rotating the pole. Now rotate the eye lag screw until it is seated.

3 Lower the Lagmaster Plus™.

DRIVE IT HOME. (socket plugs)

Install pre-cut threaded rod from the floor! Works with 3/8" or 1/4" threaded rod up to 10' long. Gets into tight spaces, vaulted ceilings, above stairwells or through ceiling grid easily.

Lagmaster Plus™ open-end socket plug-in heads work with Sammy Super Screws® and HangerMate® screws. Special twist out feature prevents over torquing and stripout even when installing from the floor.

Consult the screw manufacturer's literature for load specs and approvals on the screws.

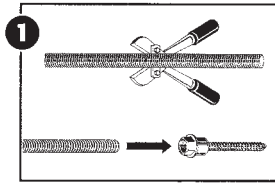

The Lagmaster Plus™ base is the socket for HangerMate® 3/8" rod screws. The 3/8" socket plug-in works with HangerMate® 1/4" rod screws. The 5/8" socket plug-in works with Sammy Super Screws®.

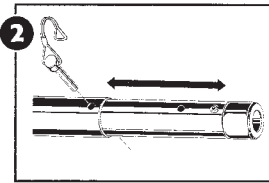

One pole...many applications!

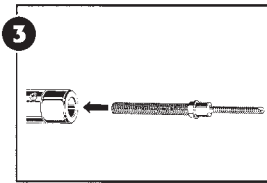

Hang Threaded Rod:

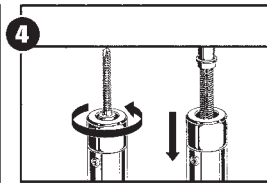

1 Cut threaded rod to length and assemble to appropriate fastener.

2 Adjust pole tool to length plug in the proper Lagmaster Plus™ head.

3 Load rod into Lagmaster pole tool. *(The Lagmaster adjusting pin has to be 1/8" below the base or the pin may interfere with the rod.)*

4 Install screw at proper site and pull down to remove the rod from the pole tool. The rod is now ready to receive hanger bracket.
(Patent # 5,154,104)

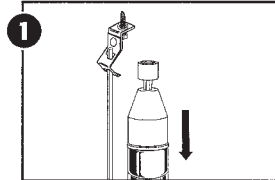

Turn your pole tool into a very long screwdriver. This Lagmaster Plus™ plug works with any 1/4" hex driver.

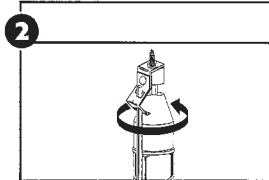

Install smooth rod with a spring clip assembly and screw. The Flash fastener is shown here.

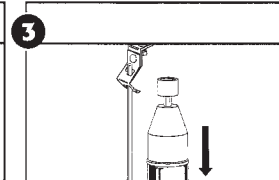

Overhead Screw Applications: (1/4" hex plug)

1 Plug in the Lagmaster Plus™ 1/4" hex head and insert the proper 1/4" driver. Adjust the Lagmaster pole tool to length.

2 Push the smooth rod between the pole and the wire bale on the Lagmaster adjusting pin to keep the rod from whipping while turning in the screw for safety.

3 Turn in the screw cautiously being careful not to over torque or strip the screw. Remove the tool.
